

Quality Policy

Our common goal is to build an environmentally friendly modern technology and production company that is successful in business, meets the needs and expectations of the Customer, is flexible in the face of changing conditions, cares for employees and working conditions, brings satisfaction to shareholders and accumulates the resources necessary for sustainable development.

We consistently implement our plans by:

- strengthening the competitive advantage necessary for continuous development, building brand value, maintaining business continuity based on risk analysis and continuous improvement of manufacturing processes,
- orientation towards meeting the technological and quality requirements of the most demanding Customers from various industries, to gain their trust in a permanent way by observing the standards of due diligence in each area of cooperation,
- partnership cooperation with carefully selected verified Suppliers for long-term and mutual benefits,
- implementation of personnel policy based on the optimal use of employees' potential, meeting their expectations in terms of ensuring working conditions and pay in accordance with standards,
- active participation in the transfer of the intellectual value stream in the area of knowledge, science and innovation in cooperation with schools and universities,
- conducting practice that is rational, active and compliant with the current requirements of Polish and EU law in the field of environmental protection, energy conservation and responsibility for work, property and product safety,
- active participation in the area of implementation of industry 4.0 solutions and implementation of innovative solutions in new technologies, processes and work organization.

The Company's management commits itself to:

- **continuous monitoring of indicators of achievement of objectives,**
- **minimizing the negative impact on the environment,**
- **continuous improvement of the Integrated Management System,**
- **meet the applicable requirements,**
- **provide the means to achieve the objectives of the Quality Policy.**
